

WHAT, WHEN AND WHERE TO SUBMIT

One **public GitHub repo** per team, submitted on your **team page**. Follow these steps in order.

1

Make your repo **AFTER 4:00 PM MON**

- Create a **new, empty, public** GitHub repo. Any name. Not a fork of the original.
- No commits before 4 PM. Add your teammates as collaborators.

2

Write and push your docs first

- Run Playbook stage 9. It writes 7 files in `docs/`: OBSERVATIONS · PRD · ARCHITECTURE · DATA_MODEL · API · GAPS · AGENT_LOG.
- Read them, fix them, and **push docs/ before any code**.

3

Submit the link **BEFORE 11:30 PM MON**

1. Open your **team page** (the status link in your leader's email).
2. Tap **Submit your repo**, paste the GitHub link, tick the clean-room declaration, save.
3. Press **Check again** to see what is missing.

No link and no docs by 11:30 PM: -1 Visa.

4

Build your rebuild **OVERNIGHT**

- New chat, in your repo, build **only from your docs**.
- First make the **3 Killer Tests** pass. Then build your **2 improvements**, one of them your **Differentiator** (page 2).
- Time limits (e.g. a 24-hour expiry) go in `.env` so they can be tested in minutes. Push often: we use GitHub's push times.

5

Add the final files

- **README.md**: what you built and how to run it.
- **SUBMISSION.md**: the template on page 2.
- **deck.pdf**: 5 slides exported as PDF, in the repo root.
- **.env.example**: every setting name, no real secrets. Never commit `.env` or `node_modules`.

Press **Check again** until every file shows ✓.

6

The freezes

Tue 8:30 AM Docs freeze. `docs/` is scored as of your last push before 8:30. Your repo link locks.

Tue 12:30 PM Code freeze. Code is judged as of your last push before 12:30. Pushing after 12:30 is a Clean-Room violation.

YOUR DIFFERENTIATOR

A copy of the original is not enough. Your rebuild must have **at least one feature the original does not have at all**: something new that makes a judge say “their version is better”.

Your 2 improvements

1. **A fix**: a real gap from your GAPS.md that the original gets wrong.
2. **The Differentiator**: a new feature or idea the original does not offer.

Both count in final judging (“Two improvements”, 40 points). The 3 Killer Tests come first: a Differentiator never replaces the hard core.

A good Differentiator

- Solves a real problem for the user in your Brief.
- Works live in your demo, on your laptop.
- Is explained in GAPS.md (why it matters) and in your deck.
- Is your own idea, not a feature the original already has.

Ideas, by track

♦ FinTech	AI that flags unusual payments or usage spikes · a plain-language bill explainer · fraud or duplicate-payment alerts · UPI-ready receipts.
♥ Workflow & Trust	AI summary of a shared document · smart reminders for whoever is holding up a signature · suggested slots based on past bookings.
♠ Real-time & Infra	AI-written incident summaries · predicting downtime from response trends · a smart digest that groups related alerts.
♣ Cyber Security	AI that explains a blocked attack in plain words · a risk score per user or IP · a security report the admin can read in one minute.

Using AI? Put the API key in `.env` (never in git) and list it in `.env.example`. If the key is missing, the app must still run and show a clear fallback, so judges can run it on any laptop. Name the model and why you chose it in SUBMISSION.md.

SUBMISSION.md template

```
Team ID:   DBG-472
Team:      Null Pointers
Card:      Smart Slot Booking
Original:  https://github.com/calcom/cal.com
Commit studied: 4f9a2c1
Run:       pnpm install && pnpm dev
Improvements we built:
  1. Fix: ...
  2. Differentiator: ...
Libraries / AI used: (name: why)
Deck:      deck.pdf (repo root)
```

Final checklist

- ☐ Public repo, created after 4 PM, not a fork
- ☐ Link saved on your team page by 11:30 PM
- ☐ `docs/` with all 7 files, pushed before code and before 8:30 AM
- ☐ 3 Killer Tests pass
- ☐ 1 fix + 1 Differentiator, both in GAPS.md and the deck
- ☐ README.md, SUBMISSION.md, deck.pdf, `.env.example`
- ☐ No `.env`, no `node_modules`, no original code
- ☐ Every file ✓ on **Check again**; last push before 12:30 PM
